

PROFESSIONAL SUMMARY

IT Project Manager with hands-on experience supporting the delivery and validation of digital products, including a stock investment app, a fiat/crypto payment platform, an enterprise brand portal for a financial services client, and a prop-tech and mortgage application platform. As a Certified ScrumMaster®, I bring Agile delivery discipline and cross-functional experience working with developers, designers, QA, and business stakeholders across the SDLC, with additional training in Product Management.

CERTIFICATIONS & TRAINING

- Certified ScrumMaster® (CSM), Scrum Alliance, Apr 2025
- Technical Product Management Mentorship (1-year), Rexversity, in collaboration with Rexwift UK, 2025
- Product Management Track, WTCF'24 (an initiative of TECH4DEV), Oct 2023 – Oct 2024
- Product Management Track, She Code Africa Academy × FedEx, Apr – Jun 2024
- Foundations of Project Management, Google / Coursera, Jul 2023

PROFESSIONAL EXPERIENCE

Project Delivery Coordinator (Contract), DeccaSoft Technologies / AMP10 Apr 2026 – Present

Product A: Stock Investment Hub (mobile app)

- Brought in to give the client visibility into a fast-moving mobile build and confidence that it was tracking to spec, sprint over sprint.
- Followed up with developers on feature progress against client and stakeholder feedback
 - Compared implemented features against business requirements
 - Reported and tracked bugs through to resolution, keeping stakeholders updated throughout
- Result:** Feature gaps were caught and corrected before reaching the client, and stakeholders had a current, reliable view of release readiness at every stage.

Product B: Fiat & Crypto Payment Platform (web + mobile)

- Took on end-to-end delivery ownership for a two-platform fintech build running without a dedicated PM in place.
- Owned sprint planning and the Jira backlog, creating and managing epics and features
 - Authored the PRD and reviewed product features implementation against Figma designs, flagging discrepancies
 - Coordinated client meetings, project meetings, and individual developer follow-ups
- Result:** Engineering work stayed scoped and prioritised sprint over sprint, design discrepancies were caught and fixed before release rather than after, and delivery moved forward without needing client escalation.
- Where formal requirements documentation wasn't available, validated implementation directly against Figma designs, closing a gap that could otherwise have let features ship out of spec.

IT Project Manager (Contract), Sharebeta LTD Sep 2025 – May 2026

Enterprise Brand Portal: Financial Services Client

- Brought on after the client moved the deadline forward, to bring multiple stalled workstreams back under control and deliver a portal the client's PMO could sign off on.
- Coordinated delivery across multiple parallel workstreams to the revised client deadline
 - Facilitated project kickoff, stakeholder workshops, progress demos, and executive reviews
 - Drafted UAT test cases through to a UAT-ready delivery
 - Owned weekly status reporting and invoice milestone tracking
- Result:** Delivered all 27 deliverables across 5 milestones on the revised deadline, reached a UAT-ready release the client could sign off without rework, and closed the engagement with positive feedback from the client PMO.

Project Management Assistant, GreyLoft Aug 2024 – Feb 2026

Property Listings & Mortgage Automation Platform (Scrum / Product Owner Assistant)

- Supported a small cross-functional team building mortgage-eligibility and loan-application flows against tight sprint cycles.
- Supported backlog grooming and sprint planning
 - Coordinated across front-end/back-end developers, a designer, and a senior product manager
 - Ran structured product testing ahead of release
- Result:** Sprint commitments stayed realistic and on track, the distributed team worked from one shared plan, and bugs were caught before reaching users.

Wealth Management Advisory Platform (Product Validation)

Partnered with a Senior Product Manager to validate direction for a wealth advisory platform before further build investment.

- Conducted user interviews and JTBD research alongside a Senior Product Manager
Result: Research findings were synthesised directly into feature prioritisation, shaping the platform's direction before further build investment.

Product Research Associate (Contract), ArtTech (*Jan 2025 – Feb 2025*): Engaged to validate problem space and MVP viability ahead of build: engaged 30+ prospective users and ran 12 structured JTBD interviews, with findings that directly shaped go-to-market direction.

Volunteer Product Manager, RecruitRadar (*Jul 2024 – Sep 2024*): Joined a team without a dedicated product lead: led market research and MoSCoW prioritisation on an AI-powered job matching platform, translating findings into a backlog the team could actually build against.

NOTABLE PROJECTS

- TrackXpense (Fintech MVP, Team Lead): 2nd Place, Capstone Demo Day (Glovo Women in Tech Bootcamp)
- My Quiz Pal (EdTech Platform, Team Lead / PM Trainee / Presenter): 2nd Place, Graduation Demo (Women Techsters Fellowship)

EDUCATION

B.Sc. (Ed) Biology, Second Class Upper, University of Ilorin, Nigeria

October 2023

National Youth Service Corps (NYSC) completed, Baptist Girls' College, Abeokuta, Ogun State (Nov 2023 to Nov 2024)
